

Toilet Training

Toilet training must be done in a caring and sensitive manner. As individuals children will be ready at different times. Some may be as young as eighteen to twenty months and others may be two and a half or even three years old.

We encourage parents to start toilet training at home where they can give them one to one. Out of term time is always best when parents can focus the child. When the child has become confident using the potty or toilet at home then we will continue to support the child at nursery following the home routine.

When the children come into the Cygnet nursery, if they are not already toilet trained, and with the parents consent, we give the children to opportunity to sit on the toilet when they have their nappy changed if they wish.

It is very important to be positive about the procedure, never make negative remarks if a child has a little accident.
